BEFORE

Support of mobility cooperation

- Mobility cooperation to find partners within mobility networks
- Mobility funding to get to know partners via staff and teacher exchanges
- Mobility funding to meet and discuss about project ideas and preparing the application

Support of other projects

- To find partners within ongoing projects
- Joining a project as an associated partner to see what it is about
- To create spinoffs from well working projects
- Using project final meeting to plan the next project
- Research results can work as a basis for education projects

DURING

Support of Mobility cooperation

- To involve more participants to project activities – more funding
- To include partners not eligible for project funding

Support of other projects

- Organizing joint dissemination events
- Sharing of best practices in project management

AFTER

Support of Mobility cooperation

- To continue the project lifetime after funding ends with mobility funding
- To fund the implementation of results – e.g. blended intensive programmes
- Mobility funds to disseminate the project results

Support of other projects

- Turn curriculum development project into a joint degree programme
- Spinoffs to other fields or projects building on the previous project
- Cooperation partnerships can be a stepping stone to research collaboration

WHAT TO TAKE INTO CONSIDERATION

- Timelines
- Rules (e.g. minimum duration of mobility)
- In Erasmus+, everything happens early and deadlines are not flexible
- In Erasmus+, everything takes time: results, starting the cooperation
 - Mobility timelines, funding calls and application times, grant agreement process, setting up and using mobility funds – internal deadlines
- Double funding is not allowed

DISCUSSION

Thinking about your own project or project idea

- Have you used other Erasmus+ funding instruments before, during or after your project? Give examples.
- What other synergies are there than the money?
- Share your best practices disseminating the project results
