

## **EUREKA**

- **EUROSTARS** and/or **Transnational Eureka lightweighting call**

Expertise of [International Laser Centre](#) includes thin film and sample fabrication (Pulsed Laser Deposition), advanced 4D characterization of materials (SIMS, AFM, SEM, SNOM), nonlinear optics (Femtosecond spectroscopy, THz generation and detection), applied optics (Brillouin spectroscopy), bio photonics (Confocal microscopy), and information and communication technologies. They are interested in contributing as a **project partner**.
